The language & its family

Sūchel is a full language built the way languages are really built: it eroded out of an older tongue, Old Pelagic, by seven regular sound changes, and it grew grammar for what its speakers cannot afford to be vague about. Every finite verb takes a position on the truth of what it says (a veridical mood) and declares which of three clocks it happened in (a temporal anchor). Word order is verb-final (SOV); the noun is simple and the verb carries the world on its back.

Old Pelagic left five other daughters, and each did something different to the ancestral *k and *g before front vowels. Ask a stranger to name the seam and their mouth files their birthplace:

mouth	the seam (*gel-)
Old Pelagic	gel
Lorkel	gel
Suchel	jel
Rudgar	ghel
Sel	zel
Beltsel	dzel
Nubhel	yel

Phonology

Romanization is one symbol, one sound. The digraphs ch, sh are single consonants; macron vowels ā ē ī ō ū are long — length is quality held, not changed, a held breath. Stress is marked in the IPA with ' before the stressed syllable.

Consonants — 17

letter	IPA	note
p	p	labial stop
b	b	labial stop, voiced
t	t	alveolar stop
d	d	alveolar stop, voiced
k	k	velar stop
g	g	velar stop, voiced
ch	tʃ	affricate (church)
j	dʒ	affricate, voiced (judge)
v	v	labial fricative
s	s	alveolar fricative (voiceless)
z	z	alveolar fricative, voiced
sh	ʃ	postalveolar fricative
m	m	nasal
n	n	nasal
r	r ~ r	tap / trill; never the English glide
l	l	lateral
h	h	word-initial only (hōl, hau, hep)

Vowels — 5 + length

letter	IPA	as in
a	a	father (short)
e	e	bed
i	i	machine (short)
o	o	story (short)
u	u	rude (short)
ā ē ī ō ū	a: e: i: o: u:	the same vowels, held

Syllable canon: (C)(r/l)V(C); no clusters of three. The old *w and *h died in Sūchel, leaving long vowels as their tombstones.

Stress — the mood carries the beat

Four rules, applied in order; the first that applies wins. In a finite verb the veridical suffix seizes the stress — you can hear the truth-claim, because the mood carries the beat. Commands assert nothing, so imperatives are beatless.

Rule 1

Compounds stress their first member.

NUV-ran · JEL-mar · SÖRN-mai · ZU-kad

Rule 2

Finite verbs: the mood seizes the stress; anchor clitics are weightless.

ve-RA-ka · ta-NA-mi · hōl-TE-she-zu

Rule 3

A long vowel seizes the stress in any other word.

SŪ-chel · HŌ-lu · MĀN · ĀN

Rule 4

Otherwise stress the penult of the stem; case suffixes never shift it. Imperatives add no beat.

i-DRE-nes · VU-re-len · TA-nu, JE-du

Nouns & pronouns

Number: plural -i (sīl 'crosser' → sīli). Case clitics attach to the noun: accusative -(e)n, genitive -en, dative -ol, locative -eth. Possession splits two ways. Alienable things take the genitive -en; but kin, one's ship, and one's gaps take the entangled suffix -mai — possession as shared amplitude, not ownership. You say kel-en 'my words' but nav-mai 'my-entangled ship'; to use -en of your own ship is to announce you plan to sell her.

case	clitic	example
accusative	-(e)n	ishen 'you (obj.)'
genitive	-en	somath-en 'of the assembly'
dative	-ol	ish-ol 'to you'
locative	-eth	jel-eth 'at the seam'
entangled	-mai	nav-mai 'my own ship'

Pronouns

	singular	plural	entangled
1	en	eni	enmai (crew-we)
2	ish	ishi	ishmai
3	an	ani	—

The verb

The verb template is STEM – (ASPECT) – MOOD = ANCHOR. Aspect: perfective -t-, imperfective unmarked. Mood is one of five and is obligatory; anchor is one of three and is obligatory on every finite verb. Negation is the particle *vo* before the verb.

The five veridical moods

AL	suffix	meaning
T	-a	classically true; settled
T⁻	-im	true-as-approached; provisional from below
T⁺	-ur	held-from-above; theoretical, unaccredited
T•	-eshe	seam-true; self-dual, both-and
F	<i>vo</i> + -a	false (negated plain)

The three temporal anchors

clitic	from	anchor
=ka	*kad- 'pulse'	beacon time — shared, verifiable
=mi	*mei- 'self'	proper time — the ship's own clock
=zu	*dzu- 'adrift'	dark time — beyond coverage

Motion verbs are ungrammatical without a depth satellite: *nuv* 'down-tower, deeper' or *hau* 'surfaceward'. And it is forbidden to place a verb inside the narration of a crossing: the particle *ne* stands where the verb cannot.

Worked examples

an sū-t-eshe=zu.
an su:'te.fe.zu
3SG cross-PFV-T•=DARK
“She crossed — seam-true, in time no beacon reached.”

kad ver-a=ka.
kad ve'ra.ka
beacon speak.true-T=BEAC
“The beacon holds true. — the safest sentence in the language.”

jed-u!
'dʒe.du
go-IMP
“Go! — an order asserts nothing, so it takes no mood and no anchor.”

The four systems

Süchel grammaticalizes what its world makes unignorable: the truth-value of the limit, the anchor of time, the direction of depth, and the place where narration fails. The showpiece is one sentence conjugated three ways — doctrine, heresy, and the tragic truth differ only by their morphology:

THE SCHEME-ENDING
tem kav-eth vō dur-a=ka.
pattern limit-LOC NEG endure-T=BEAC
“No pattern endures at the limit.”

THE DIRECTION-ANCHOR
tem kav-eth dur-ur=zu.
pattern limit-LOC endure-T*=DARK
“A pattern endures at the limit”

THE PLACE-WHERE
tem kav-eth dur-eshe=zu.
pattern limit-LOC endure-T•=DARK
“A pattern endures — seam-true — in dark time.”

Vocabulary

The core lexicon of the codex, followed by the working vocabulary of daily speech. Every form is derived from an Old Pelagic root by the seven sound changes — nothing is invented at the surface. Forms are given with IPA where the codex records it.

Core lexicon

Sūchel [ˈsuː.tʃel] the crossing-speech; this language	nuvi [ˈnu.vi] diver; depth-pilot
Pelgar [ˈpel.gar] Old Pelagic; the Assembly's tongue	nuvdol [ˈnuv.dol] depth-well
sū [suː] to cross the seam (v., irregular)	tur [tur] the Tower; the OCT
sūath [ˈsuː.ath] a crossing (n.)	Turmai [ˈtur.mai] the Tower (reverent: 'our-entangled Tower')
sīl [siːl] crosser; seam-pilot	kav [kav] tolerance; the curvature limit K
Sōrn [soːrn] the threading engine; the drive	Kaveth [ˈka.veth] at-the-Limit (the frontier, as a place)
jel [dʒel] the seam 𐌶	tem [tem] pattern; woven form; (K5) the pattern that may cross
jelmar [ˈdʒel.mar] seam-pearl	temor [ˈte.mor] information reef
jelvos [ˈdʒel.vos] seam-scar	mor [mor] reef; sea-rock
jelsil [ˈdʒel.siːl] seam-crosser (formal)	mar [mar] pearl; sea-stone
Idrenes [iˈdre.nes] the opened path; the bridge	velosh [ˈve.loʃ] Formless mouth
idren [iˈdren] a bridge, an opened way (common n.)	vel [vel] nothing; no-thing
kad [kad] beacon; the pulse; (by extension) time-as-kept	ver [ver] truth; to speak-true (v.)
kadur [ˈka.dur] beacon-cycle (unit)	vur [vur] to spin, whirl; to go mad
zukad [ˈzu.kad] dark time; unanchored duration	vurel [ˈvu.rel] madman; the spun-one
zu [zu] adrift; (gram.) the dark-time anchor =zu	Vurel-lor [ˈvu.rel lor] the Madman's Theorem
mi [mi] self; (gram.) the proper-time anchor =mi	eshe-ver [ˈe.ʃe ver] the Tragic Truth (lit. 'seam-true truth')
ka [ka] (gram.) the beacon-time anchor =ka	pevlor [ˈpev.lor] the logic Λ L (lit. 'five-rule')
ne [ne] the gap-particle; the unspeakable interval	lor [lor] rule; law
nexath [ˈne.ksath] a gap (n.); a hole in a life	somath [ˈso.math] assembly; gathering
nuv [nuv] down-tower; deeper (directional)	Pelgar Somath [ˈpel.gar ˈso.math] the Pelagian Assembly
hau [hau] surfaceward; up-tower (directional)	nav [nav] ship
hōl [hoːl] to surface	navmai [ˈnav.mai] one's own ship (entangled)
nuvran [ˈnuv.ran] running under; dive-desync vertigo	mān [maːn] hand; crew-hand, crewmate

chel [tʃel]
speech; tongue, language

kel [kel]
(Old Pelagic) speech — preserved in liturgy

ran [ran]
to run

tel [tel]
to reach, arrive at; (num.) three

dur [dur]
to endure, survive

dol [dol]
pit; well

osh [oʃ]
mouth

vos [vos]
wound

en [en]
I (1SG)

ish [iʃ]
you (2SG)

an [an]
she/he/it (3SG)

eni [ˈe.ni]
we (plain plural)

enmai [ˈen.mai]
we (entangled; crew-we)

ishmai [ˈiʃ.mai]
you, held-as-kin (entangled 2SG)

-mai [mai]
entangled-possession suffix

-ath [ath]
nominalizer (act or result)

-eth [eth]
locative case

-ol [ol]
dative case

-en [en]
genitive (alienable)

vo [vo]
not; negation particle

ve [ve]
to be (copula)

sa [sa]
one

vor [vor]
two

telnum [tel]
three (see tel)

mek [mek]
four

pev [pev]
five

shen [ʃen]
six

hep [hep]
seven

ok [ok]
eight

nur [nur]
nine

dak [dak]
ten

jed
to go, move (always with directional)

tan
to hold, keep

id
to open

men
to wait, remain

ret
again

ān [aːn]
breath

kru
blood

gal
the Still; becalmed vacuum (Dead-Sea)

lesh
alignment; fair phase; luck

maiel [ˈmai.el]
kinsman; bound-one

om
all, every

vu
question particle (final)

-u [u]
imperative (non-assertive: no mood, no anchor)

ō [oː]
vocative particle

-a [a]
mood T: classically true; settled

-im [im]
mood T̄: true-as-approached (IR)

-ur [ur]
mood T̄: held-from-above, unaccredited (UV)

-eshe [ˈe.ʃe]
mood T•: seam-true; self-dual

-t- [t]
perfective aspect

-i [i]
plural

-el [el]
agent suffix

-ur (dur) [ur]
duration suffix (kadur)

Working vocabulary (coined, derived)

beasts

hund [hund]
dog; hold-beast

kat [kat]
cat; ship-cat

vurm [vurm]
worm; hull-borer

vejel ['ve.dʒel]
bird; air-swimmer

kabal ['ka.bal]
horse; ground-runner

body

chep [tʃep]
head

luk [luk]
eye

tol [tol]
ear

ned [ned]
heart

bon [bon]
bone

der [der]
skin; hull of the body

pod [pod]
foot

jish [dʒiʃ]
voice

mus [mus]
flesh; muscle

shen [ʃen]
to breathe (v.)

kruren ['kru.ren]
vein (lit. blood-path)

food

ed [ed]
to eat (v.)

bib [bib]
to drink

brod [brod]
bread; keel-loaf

lem [lem]
milk

sup [sup]
soup, broth; wet meal

shem [ʃem]
seed

kres [kres]
to grow (v.)

dap [dap]
meat, flesh-food

kin

am [am]
mother

at [at]
father

bem [bem]
child

shir [ʃir]
sibling; crossing-partner

dam [dam]
friend; hearth-mate

gur [gur]
stranger; one from outside coverage

mār [ma:r]
captain

velan ['ve.lan]
widow; the one left in coverage

nom [nom]
name

bal [bal]
elder; keel-laid-first

mind

vis [vis]
to know

log [log]
to think, reason

vil [vil]
to want

luv [luv]
to love

dred [dred]
fear

gōd [go:d]
joy

trur [trur]
grief; the ne-shaped feeling

hov [hov]
to hope; to hold toward T

number

chent [tʃent]
hundred

halb [halb]
half

qualities

mag [mag]
big, great

min [min]
small

lam [lam]
long

tuk [tuk]
short

dem [dem]
heavy

lit [lit]
light (in weight)

rav [rav]
fast (v. 'to run hot')

hal [hal]
slow; held-back

sea

mōr [mo:r]
wave

tid [tid]
tide; the breathing of the sea

grun [grun]
seafloor; the true bottom

skum [skum]
foam; spent wave

ship

chil [tʃil]
keel; the first truth of a ship

stur [stur]
mast; the ship's tower

stir [stir]
to steer (v.)

shechel [ʃe.tʃel]
sail; wind-catcher

hul [hul]
hull

sky

ster [ster]
star

mem [mem]
memory; what the gap cannot hold

kilver [ˈkil.ver]
keel-truth; a fact that survives docking

memdol [ˈmem.dol]
archive (lit. memory-pit)

mol [mol]
many

pau [pau]
few

metur [ˈme.tur]
measure; taken size

bon [bon]
good; sound (of hulls and hearts) (v. 'to be sound')

mal [mal]
bad; unsound

pol [pol]
full

vak [vak]
empty; hollow

lek [lek]
near; within hail

telur [ˈte.lur]
far; at reach's end

rej [redʒ]
straight; true-cut

kriv [kriv]
crooked; off-true

mig [mig]
fish

velk [velk]
kelp; weed of the deep

salm [salm]
current (of water); the sea's road

salvat [ˈsal.vat]
seawater; brine

porta [ˈpor.ta]
hatch, door (v. 'to open a way' > n.)

gom [gom]
cargo; carried weight

rem [rem]
oar; to row

navdol [ˈnav.dol]
shipyard (lit. ship-pit)

tandol [ˈtan.dol]
anchor (lit. hold-pit); the held pause

lun [lun]
moon; any moon

sol [sol]
sun; the home star

heban ['he.ban]
sky; the upper sea

time

dag [dag]
day; one waking

zun [zun]
night

jer [dʒer]
year; one full beacon-round

nun [nun]
now; this pulse

ant [ant]
before; upstream in time

pos [pos]
after; downstream in time

tools

schir [stʃir]
knife, blade

ham [ham]
hammer; striking stone

sag [sag]
saw; toothed blade

sheg [ʃeg]
rope, line

net [net]
net; woven catcher

verbs

vid [vid]
to see

klut [klut]
to hear

dot [dot]
to give

kaver ['ka.ver]
to take, seize

mak [mak]
to make, build

brek [brek]
to break

menda ['men.da]
to mend, repair

porter ['por.ter]
to carry

jek [dʒek]
to throw

nubes ['nu.bes]
cloud (lit. place-of-under)

luzkad ['luz.kad]
lighthouse-pulse; a beacon's visible light

steren ['ste.ren]
star-road; a plotted course

zemkad ['zem.kad]
eclipse; a beacon shadowed

sob [sob]
to sleep (v.)

drem [drem]
dream; unanchored seeing

ald [ald]
old; worn smooth

niv [niv]
new; unworn

tidkadur [tid'ka.dur]
tide-cycle; a working month

solhau [sol'hau]
dawn; sun surfacing

solnuv ['sol.nuv]
dusk; sun diving

kov [kov]
cup, vessel (v. 'to hold liquid')

pan [pan]
pan; flat vessel

vag [vag]
cart; rolling carrier

mignet ['mig.net]
fishing net

lukmar ['luk.mar]
lens (lit. eye-pearl)

binda ['bin.da]
to bind, lash

snid [snid]
to cut

bren [bren]
to burn

nad [nad]
to swim

pal [pal]
to fall

stan [stan]
to stand

shed [ʃed]
to sit

ben [ben]
to come

lib [lib]
to live

nek [nek]
to die

world

vat [vat]
water (fresh); drinking water

sal [sal]
salt; the sea's taste

tir [tir]
earth, ground; settled land

pir [pir]
fire

luz [luz]
light

zem [zem]
shadow, dark

venda ['ven.da]
to find (one's way to)

lus [lus]
to lose

ven [ven]
wind

rōd [ro:d]
storm

sniv [sniv]
rain; falling water

chir [tʃir]
cold

tev [tev]
warm; kept-alive (v. 'to hold warmth')

pirmor ['pir.mor]
volcano (lit. fire-rock)

venosh ['ve.noʃ]
storm-front (lit. wind-mouth)

Sentences

The phrasebook — forty-one lines composed from the grammar, each with its morpheme gloss and translation — then the three texts. Every Sūchel line here is generated through the grammar, not stored as a string.

HAILS & PARTINGS

kad ret ve'ra.ka
beacon again true-T=BEAC

“The beacon holds again.”

A pilot's log, after a crossing

enmai kad tel-eth sū-t-eshe=ka.

1PL.ENT beacon three-LOC cross-PFV-T•=BEAC

“We crossed at the third beacon.”

ne.

GAP

“—”

enmai hōl-t-eshe=zu.

1PL.ENT surface-PFV-T•=DARK

“We surfaced, in dark time.”

Three sentences tell the whole voyage through grammar alone: the crossing seam-true, the departure =ka, the return =zu — and between them the mark for the interval that never became memory. A censor could reconstruct the flight plan from the morphology.

Catechism, with one heretical answer

— tem kav-eth dur-a=ka, vo?

pattern limit-LOC endure-T=BEAC, NEG

““Does a pattern endure at the limit — no?” (the catechist, expecting the doctrinal denial)”

— vo dur-a=ka, somath-en ver-eth.

NEG endure-T=BEAC, assembly-GEN truth-LOC

““It does not endure — in the Assembly's truth.” (the correct answer)”

— dur-eshe=zu.

endure-T•=DARK

““It endures — seam-true, in the dark.” (the pupil who will not pass; the answer that cannot be graded, only punished)”

The pupil's heresy is two morphemes long: -eshe for -a, =zu for =ka. Doctrine and its undoing differ by a conjugation — the entire K5 controversy, miniaturized into a classroom.

Ne-liturgy, for the unreturned

sīli sū-eshe=mi.

crosser.PL cross-T•=PROP

“The crossers cross, by their own clocks.”

ne.
GAP
“__”

kad vel ver-a=ka.
beacon nothing speak.true-T=BEAC
“The beacon vouches for nothing.”

ne.
GAP
“__”

enmai ish-mai tel-im=zu.
1PL.ENT 2SG-ENT reach-T̃=DARK
“We reach toward you — approaching-true, in the dark.”

The mourning form for those lost past coverage; every second line is the gap-mark — grief structured as the thing it grieves. The last verb is T̃, the mood of a limit neared from below, and the entangled -mai on 'you' declares the dead still possessed as kin.

The script & the family

Süchel is written in Navcher, the fleet script — a featural alphabet in which letterforms encode phonetics. This manual sets the language in the Latin romanization; the script itself, in its living Current Hand and its sacred carved Logos hand, is rendered in the interactive codex (odylang web) and by the command `odylang write`.

Old Pelagic survives beyond Süchel in four settled sisters and the Wolori's working register. The same proto-word wears each mouth's sound laws — the family, audible in a single syllable.

```
*gel- → old gel · lor gel · suc jel · rud ghel · sel zel · bel dzel · nub yel
*kel → old kel · lor kel · suc chel · rud khel · sel sel · bel tsel · nub hel
*suw-kel → old suwkel · lor suwkel · suc süchel · rud suwkhel · sel süsel · bel suvt sel ·
nub sühel
*wer-stan → old werstan · lor werstan · suc verstan · rud werstan · sel ěrstan · bel
verstan · nub berstan
```

Colophon. Generated by `odylang` from the NERV//Pelagian Assembly language codices. The grammar, every lexical and phrasebook form, and the interlinear glosses are produced by the package; the PDF itself is written by a dependency-free engine that embeds a TrueType face so the macrons and IPA render true.
